KORG TUNER SERIES

High-quality tuner with metronome function and LED meter

- Wide seven octave tuning range. Displays the values and symbols for note, octave, metronome tempo, and beat on an illuminated LCD.
- Generates a reference tone of 4 octaves through the built-in speaker. Outputs the specified pitch for 5 sec through the built-in speaker in the sound play mode.
- Allows tuning in two modes—auto and manual. Meter response speed can be set to fast or slow.
- Enables selection of measures from 0 through nine—a quarter note=40 through 208—through the PCM-recorded metronome.
- Calibration, memory, and by-pass functions. Two-way power system.

DTM-12
DIGITAL TUNER METRONOME

- 166(W) x 194(D) x 32.7(H)mm  ■ 384g (including batteries)

DT-1 DIGITAL TUNER

Cassette-size compact tuner for performing on the stage.

- Measures up to seven octaves.
- Generates reference sound for 4 octaves from C2 to B6 through the high-resolution quartz generator by connection with peripheral amplifiers.
- Meter response speed can be set fast or slow.
- Calibration, by-pass, and battery-check functions. Two-way power system.

- 109(W) x 69.5(D) x 17(H)mm  ■ 123g (including batteries)

DT-2 DIGITAL TUNER

Five color variations. Individual-oriented tuner.

- 116(W) x 73.3(D) x 24 – 38.5(H)mm  ■ 129g (including batteries)

NEW!

DT-1 PRO DIGITAL TUNER

The world’s first, rack-mount digital tuner.

- Enables speedy and accurate tuning for professional studio + live performance.
- Large LED meter for easy reading even from a distance.
- Measures up to seven octaves.
- Enables connection to a maximum of 4 sound-source modules in the rack through 4 line input/output terminals, and tuning for each module without changing the patching.
- Front-panel input and 4-line Mix-out and by-pass functions are convenient for guitarists and bass players.
- LED meter response speed has two modes—fast and slow.
- Calibration and mute functions.

- 456(W) x 221(D) x 44(H)mm
- 2.5kg (Net including rack mount adaptors)

KORG
People and Technology in Harmony
KORG TUNER SERIES

KORG needle-type tuner series supported by musicians around the world because of its superb accuracy and durability.

AT-12
AUTO CHROMATIC TUNER

Fully-automatic tuner with selectable chromatic musical notes, a pitch range of seven octaves and an easy to read needle meter.

- Needle response speed has two modes—fast and slow. Generates reference sounds for 4 octaves from C2 to B6 through the built-in speaker by the high-resolution quartz generator (volume adjustable). Holds the reference pitch through the battery backup function after the power is turned off. Calibration, by-pass, battery backup, and battery save functions.
- Meter lamp. Two-way power system.

NEW!

AT-1
AUTO TUNER

Realizing complete practicability based on large display and functional design

- Quickly responds to pitch change through an advanced CPU. Automatic measurement of seven-octave range and LED data display.
- Generates reference sounds for seven octaves from C3 to B6 through the built-in speaker by the high-resolution quartz generator.
- Improved visibility with tuning indicator in addition to the visible needle. Calibration check function capable of corresponding to every concert pitch and displaying the pitch during tuning. Calibration, by-pass, battery backup, battery-empty, and backlighting functions. Two-way power system.

GT-60X
GUITAR TUNER

- Dedicated guitar/bass compact tuner
- Compact, lightweight and high cost-performance tuner using high-resolution quartz generator. Measurement range of ±1 octave centering around each position. Enables pitch adjustment during musical performances using the by-pass function. Lock-type lamp available for dim stage set-ups. Two-way power system.
